Note: Performance Art: The space between art and life. This course investigates the practice of performance art and its origins. Pulling from a variety of disciplines such as experimental theater, body mechanics, improvisation, meditation, and psychology, we will develop skills that utilize the body as a tool for art-making. Additionally, we will survey the unique history of performance art and the mediums utilized for its presentation and dissemination, including live performance, video, and still images. Open to Majors and Minors.

Note: Class will be meeting in the new Digital Photo Lab Room ART 264A (around the corner from the dark room). Watch for additional information from the instructor thru Canvas.

**THIS DEPARTMENT ENFORCES UNDERGRADUATE PREREQUISITES. Please note that the registration system may not factor in transfer work when determining if prerequisites have been met. If you are unable to register for a course and think you have met the prerequisite(s), please contact an advisor from this department to inquire about obtaining a permission code. You may be administratively dropped from a course if the prerequisite has not been met.**

Note: Meets with: CS 6610

Note: Meets with: CS 6635

Note: Sections 2-4 belong to this lecture. This course requires registration for a lab and/or discussion section. Students will be automatically registered for this lecture section when registering for the pertinent lab and/or discussion section.

Note: Meets with: CS 6780, ECE 5780, ECE 6780

Note: This course studies advanced data structures and algorithms for handling scalability challenges in large-scale data analysis and machine learning pipelines. It will cover modern hashing techniques, filters and sketching algorithms, locality sensitive-hashing, succinct data structures, string algorithms, graph algorithms, external memory algorithms, and learned indexes. This course is appropriate for both undergraduate and graduate students with intermediate data structure and algorithm skills.

Note: This course will cover the recent advances in computer vision, with focus on understanding state-of-the-art methods, analyzing their strengths and weaknesses, and identifying future research opportunities. Example topics covered in this course: object and action recognition, video understanding, self-supervised representation learning, zero- and few-shot learning, transfer learning, language and vision, audio and vision, vision for robotics, image generation, image manipulation, and egocentric perception.

This is an advanced vision course for graduate students, previous knowledge of machine learning or deep learning (e.g., CS 5350/6350 or CS 5353/6353) is recommended.

Note: Africanist Aesthetics in Screendance is a critical theory course that centralizes discussion-based and experiential learning. Concepts will include the history of black screendance, the emergence of Sankofa, oppositional gaze, ephebism, “coolness,” polyrhythms and polycentrism. Each week students will read an article by theorists such as bell hooks, Stephanie Batiste, and Elena Benthaus, view and analyze Africanist aesthetics on screen, and practice applying these principles to their work through in-class camera activities. At the end of this course, students will produce a short dance film incorporating concepts explored during the semester. Students will have creative autonomy in exploring concepts of interest.

Note: Queering Ballet will take a critical lens to gender and sexuality in ballet and dance, while considering alternatives through creative methods of storytelling and choreography. Students will be tasked with deconstructing familiar classical stories and reimagining them to represent 21st century life, bodies, values and experiences. Queering ballet is open to anyone interested in movement, queering gender, performance and storytelling.

Departmental Advisors:

All classes are for matriculated dental students only.

For course descriptions and pre-requisite information click on the subject column next to the appropriate catalog number.

**THIS DEPARTMENT ENFORCES PREREQUISITES.** Please note that the registration system may not factor in transfer work when determining if prerequisites have been met. If you are unable to register for a course and think you have met the prerequisite(s), please contact an advisor from this department to inquire about obtaining a permission code. You may be administratively dropped from a course if the prerequisite has not been met.

#### Notes
- **TPC 1:** The course meets with EAE 6900.
- **TPC 3:** The course meets with EAE 6250.
- **EAE 4900-001:** This course is designed for game development students who are interested in investigating the theories and “soft” skills needed to work effectively on a team. We will focus on understanding basic team building practices, emotional intelligence theories, fundamental Lean/Agile project management processes, conflict resolution techniques, as well as pitching and presentation practice.
- **EAE 4900-002:** In this course we will examine in-depth a variety of cognitive principles relevant to the design of video games. The purpose of this course is two-fold: (a) to provide students with a deep understanding of the psychology at work during play and (b) to identify how to make psychological principles actionable during the process of designing a video game. We will explore challenges around human perception, attention, memory, problem solving, and learning, in order to predictably design the engaging games we intend.
- **EAE 4900-003:** This seminar combines theory and practice as students study a game genre (established or emergent) by critically playing, engaging with scholarly work, and meeting to discuss and present on the games studied. The game genre of study will vary from semester to semester. This semester’s genre will be “tactical” games.
- **EAE 4900-004:** Real-time VFX is a type of dynamic animation used to add polish and breathe life into a game. It encompasses anything that moves that isn’t a character or an object, and is typically split into two categories; gameplay effect and environment effect. Things like water, fire, explosions, spells, and electricity are typical effects that a VFX artist may develop for a project. This course will cover fundamental elements of VFX like creating particle systems, authoring complex shaders and materials, optimization, generating and using flip books and more.
- **EAE 4900-005:** This course teaches students how to create, modify, and compose vector graphics using Adobe Illustrator software. It also contains lectures discussing creative process, the artistic principles (color, value, shape, composition etc.), and industry practices.
- **EAE 4900-006:** On Difficulty: Games, Art, Communication - This course examines difficulty in games, literature, and art. We will consider how game designers and theorists of art have conceptualized difficulty, while also looking closely at particular video games, novels, poems, and paintings that are known for being difficult.

Note: Through readings, lectures, collaborative discussions, presenting out research and working through building a high level business plan, you will undertake a crash course in learning how to manage a video-game business, including how it will affect your design decisions. You will leave this class with strategies on how to present your game to a publisher, how to present yourself in a professional and business-minded way, use industry standard resources for forecasting and research, and have the tools to create your own internal business plans to give you a leg up in this extremely competitive and highly volatile arena.

This is a highly participatory class where you will be doing research on current live projects, presenting analysis and business plans to your classmates, and generally diving deep into the business side of the industry to see how understanding that landscape may affect your production and design plans for your next opus.

For course descriptions and pre-requisite information click on the subject column next to the appropriate catalog number.

All ESSF classes are graded as Credit/No-Credit (C/NC). Letter grades are not awarded except in ESSF1098.

**THIS DEPARTMENT ENFORCES UNDERGRADUATE PREREQUISITES.** Please note that the registration system may not factor in transfer work when determining if prerequisites have been met. If you are unable to register for a course and think you have met the prerequisite(s), please contact an advisor from this department to inquire about obtaining a permission code. You may be administratively dropped from a course if the prerequisite has not been met.

An exploration of how film critics, scholars, makers, and fans have engaged with the enduring concept of genre. Areas of investigation will include the structure and form of genres; the purpose of genres; the relationship between individual films and their genre(s); genre history; and genre in national and transnational contexts. By closely engaging with important films and seminal pieces of scholarly and critical writing, students will acquire an advanced theoretical and historical understanding of “genre” as an analytical concept that can be used to categorize, examine, understand, and celebrate cinema.

<td>Note: This course is hosted entirely through Canvas. Students enrolled must log into the Canvas course one week prior to the start of the semester as assignments are due the first week of class. The course has weekly deliverables and no extension of due dates will be given. Each module requires extensive textbook reading, video lectures and self-study. Deliverables are comprised of weekly homework assignments, weekly quizzes, a midterm, and a final exam, all with fixed closing times on a strict calendar schedule. Exams will be proctored through University testing centers or virtually proctored online. This is an online course, which does not have a specific meeting time or location throughout the semester. THIS DEPARTMENT ENFORCES UNDERGRADUATE PREREQUISITES. Please note that the registration system may not factor in transfer work when determining if prerequisites have been met. If you are unable to register for a course and think you have met the prerequisite(s), please contact an advisor from this department to inquire about obtaining a permission code. You may be administratively dropped from a course if the prerequisite has not been met.

Placement exam required for 1020, 2010, 2020 and 3000-level courses for students not already registered in language courses. See webpage at https://languages.utah.edu/languages-requirements/language-placement-testing.php for more information. For answers to questions email wlc-advising@utah.edu or call (801) 581-7561.

For course descriptions and pre-requisite information click on the subject column next to the appropriate catalog number.

THIS DEPARTMENT ENFORCES UNDERGRADUATE PREREQUISITES. Please note that the registration system may not factor in transfer work when determining if prerequisites have been met. If you are unable to register for a course and think you have met the prerequisite(s), please contact an advisor from this department to inquire about obtaining a permission code. You may be administratively dropped from a course if the prerequisite has not been met.

<td>Note: Students will be required to purchase a “Themis Coursebook” for the course ($100). This is the only required textbook for the course. Students will receive an email during or before the first week of school with ordering instructions. Students will pay for the text online through Themis Bar Prep and pick up the text during the first week of school as instructed by the professor. The text fee covers the printing and assembling costs and the cost of a trained Bar grader who will grade several essays during the semester to provide students with feedback and scoring mirroring the scoring on the Bar exam. Each student enrolled in the course must purchase the required text and pay the full textbook fee. The text cannot be shared between students and the text is only available through Themis, so it cannot be purchased through other sellers. Note: Fulfills one portfolio requirement. Note: This course is Pass/Fail and will count toward the maximum ungraded credit limit.</td>

Note: This is an in-person class taught by Samantha Couper and Theresa Orison. The first meeting takes place at the University Connected Learning and Continuing Education building (540 Arapeen Drive, SLC). The second session meets at the entrance to the Herd Management Area (HMA), about a 1.5-hour drive from Salt Lake City. Specific directions will be given to registered participants in the first meeting. The main road on the HMA is packed dirt/loose gravel and generally very dusty. Please be sure you have a spare tire for your vehicle. This trip may require some light hiking. Binoculars, a spotting scope, or cameras with zoom lenses are encouraged (the instructor will provide a scope and binoculars for participants to share). Class is limited to 10.

**University Connected Learning**

Note: This class takes place in person at All Together Skatepark (660 S 400 W Suite 300, SLC). Please bring a water bottle, snacks, and a good pair of skate shoes (vans, slip-ons, or other streetwear shoes). Special fee is for space rental and skateboard/gear rental. Class is limited to 10.

Note: Students should be experienced skiers comfortable skiing on difficult trails (black diamonds), navigating ungroomed terrain, and confident in avoiding natural features like trees, rocks, and drops. Class takes place at Snowbasin Resort in Huntsville, Utah. Students will be notified of the exact meeting location one week before class. Students are responsible for their own transportation to and from the resort. Special fee includes a one-day pass. Students are responsible for their own gear and equipment including skis, poles, boots, and appropriate attire. Helmet and goggles are also required. Students will provide their own lunch, snacks and water, however, food services are available for purchase on the mountain. Class is limited to 8.

<td>Note: his is an asynchronous, online course, so there are no regularly scheduled class lectures. However, there are weekly due dates and a few required interactions. Exams will be given in-person at either the UofU testing centers (SLC, Sandy, St. George) or at approved proctors whom students find and arrange. You will have multiple-day windows to take exams. Online, at-home testing is not currently available. There are also 1-hour zoom discussion groups which are graded and held weekly on Mondays and Tuesdays. Multiple time options, including mornings and evenings, and alternative ways to complete this component will be provided.</td>

Quantitative Reasoning (Math)

Quantitative Reasoning-Math
Quantitative Reasoning (Math)

Note: This is an asynchronous, online course, so there are no regularly scheduled class lectures. However, there are weekly due dates and a few required interactions.

Exams will be given in-person at either the U of U testing centers (SLC, Sandy, St. George) or at approved proctors whom students find and arrange. You will have multi-day windows to take exams. Online, at-home testing is not currently available. There are also 1-hour zoom discussion groups which are graded and held weekly on Mondays and Tuesdays. Multiple time options, including mornings and evenings, and alternative ways to complete this component will be provided.

University Connected Learning, Quantitative Reasoning-Statistics/Logic
Quantitative Reasoning (Statistics/Logic)

Meets with: MATH 107

Meets with: MATH 107

Note: This class meets at the Sandy Campus at 10011 Centennial Parkway, Suite 100, Sandy. For directions call 801.587.2520 or visit https://sandy.utah.edu/

Note: Influence(rs) in the Age of Social Media is a special topics survey course about the practices and impacts of social media, particularly as they are articulated by the social media influencer (SMI) industry. This course will assess the intersection of social media platforms, influencer imperatives, and organizational use of social media, and this intersection’s implications for ethical business practices. The purpose of this course is to blend learning and application of communication theories with critical assessment of texts and cases in order to enhance understanding of the complexities of the ever-changing social media landscape and its relevance to students pursuing careers in business.

Note: The goal of this course is to understand how business research can benefit from machine learning methods. The seminar will expose students to the recent findings in business and social science as well as computational algorithms. Discussion will revolve around how methods can be applied to answer research and applied questions. Topics will include research in business, social science, and machine learning methods such as natural language processing, interpretable AI, causal models, image analysis, and generative models.

Note: Session I. Class meets Jan. 12, 19, 26; Feb. 2, 9. Department consent required. Submit this form to request a seat: https://eccles.qualtrics.com/jfe/form/SV_8zTUIvPrzhQn1I.

**THIS DEPARTMENT ENFORCES UNDERGRADUATE PREREQUISITES.** Please note that the registration system may not factor in transfer work when determining if prerequisites have been met. If you are unable to register for a course and think you have met the prerequisite(s), please contact an advisor from this department to inquire about obtaining a permission code. You may be administratively dropped from a course if the prerequisite has not been met.

Note: OS X (Apple) is used in MUSC 1340. Students whose personal computer is not OS X or who do not own the software used in the class may work on computers in the McKay Music Library or the Marriott Library. Reading grand staff and familiarity with intervals, chords, keys, and scales is required. A music theory fundamentals course (such as MUSC 1100) is strongly recommended.

THIS DEPARTMENT ENFORCES UNDERGRADUATE AND GRADUATE PREREQUISITES. Please note that the registration system may not factor in transfer work when determining if prerequisites have been met. If you are unable to register for a course and think you have met the prerequisite(s), please contact an advisor from this department to inquire about obtaining a permission code. You may be administratively dropped from a course if the prerequisite has not been met.

At Broadway Centre Cinemas, registered participants will gather at 1:30 PM and Marcie will preview Sundance 2023 as well as review award season movies - both past and upcoming. Then at 2:30 PM you will watch BABYLON, directed by Damien Chazelle and starring Brad Pitt and Margot Robbie. Movie synopsis: Decadence, depravity, and outrageous excess lead to the rise and fall of several ambitious dreamers in 1920s Hollywood. Please note: validated parking provided in the garage east of Broadway (in between Copper Onion and Copper Common) on floors 4-7 designated for public parking. Bring parking ticket into Broadway for validation. BABYLON is quite long, 3 hours and 10 minutes, so this event ends after 5:30 PM. During Osher's holiday break, questions can be sent to Marcie at marciciecollett@slfs.org |

Note: Contemporary Ethics: Moral disagreements are tearing the fabric of American society apart. In this series, David will provide an overview of moral theories in circulation today, including relativism, egoism, utilitarianism, deontology, divine command theory, and virtue theory, and will apply these theories to abortion, war, end-of-life questions, and gun control. His lectures will include commentary on both the ethical and legal aspects of these issues. Instructor: David Smith. Registration deadline is Dec 30. A mandatory orientation will be held on Jan 5 at 12:00 pm (MT) for all enrolled attendees.

Note: CRISPR and the Gene Editing Revolution: Since the development of CRISPR technology 10 years ago, there has been a revolution in biology, medicine, and agriculture because we can now modify the genetic makeup of any organism, including ourselves. Cures for many genetic diseases including sickle cell, muscular dystrophy, and cystic fibrosis are now in clinical trials. Similarly, new treatments for cancer and heart disease are being tested. Genetically modified babies are now feasible and three have already been born. Control of disease-spreading mosquitoes is possible. New crop varieties promise to be more sustainable and more nutritious. Which of these technologies should we enthusiastically embrace, which should we ban, and how should we regulate these applications? The lecture portion of this class will explain the technologies and the participants will subsequently discuss our options for the future. Instructor: Bryan McKersie. Registration deadline is Dec 30. A mandatory orientation will be held on Jan 5 at 12:00 pm (MT) for all enrolled attendees.

Why does it look like that? This class will look at the ideas and artists who sowed the early seeds of modernism in 19th-century Paris and continue through to Abstract Expressionism which exploded in America 100 years later in the 1960s. From Impressionism to Cubism to Surrealism and abstraction we will trace - and understand - the evolution of 20th-century art. Instructor: Nancy McAfee. Registration deadline is Dec 30. |        | 01/28/2023 - 03/04/2023 | University Connected Learning | Note: Retirement Reimagined - Is a Portfolio Life in Your Future?: Today's longer life expectancy and better health mean we are likely to have the opportunity to have a "Portfolio Life." A Portfolio Life is an appealing and intentional way of thinking about living in an extended middle age, beyond the end of your job. How do you want to live during the years typically called "retirement?" You can choose to create a balanced mix of work, learning, leisure, healthy living, family time, and giving back, tailored to your priorities and goals. Retirement was once relegated to winding down. Today it holds the possibility of being your most significant and passionate years. It's a time to truly be yourself, discover new ways to contribute to society, and live a fulfilling life. This workshop series will help you create your own plan for a Portfolio Life, through lectures, self-reflection, and small and large group discussions. Instructor: George Dow. Registration deadline is Dec 30. A mandatory orientation will be held on Jan 5 at 12:00 pm (MT) for all enrolled attendees.

Note: The 1619 Project and Critical Race Theory: In this six-week course, we will go back to basics. We will push past the headlines, the op-eds, and the shouting on cable news and talk candidly about what The 1619 Project actually says—and what it doesn't say. We will engage with the debates among leading scholars as to its claims and to their merits and get as close as we can to the subjects—like the American Revolution, the Constitution, Abraham Lincoln, and Reconstruction—around which so many of these debates over The 1619 Project have swirled. Critical Race Theory is, of course, a bit harder to pin down. There is no manifesto, no mission statement, or special magazine supplement. That has made CRT a moving target. Our goal will be to establish its core premises, describe them accurately, and interrogate their validity—and do so with respect for those moments when we inevitably disagree. Our purpose here is not to promote and persuade, disparage and reject, or let alone proselytize. Instead, we hope to leave you with a better understanding of both The 1619 Project and CRT upon which you can then base your own informed opinions.

Instructor: Richard Bell. Registration deadline is Dec 30. A mandatory orientation will be held on Jan 5 at 12:00 pm (MT) for all enrolled attendees.

Note: The World of Musical Satire: Explore the delights of musical satire in a variety of genres, cultures, and eras, especially in America since 1950. This multimedia course covers "Yankee Doodle," slave satire, Gilbert & Sullivan, the Gershwin's, the Marx Brothers, Tom Lehrer, Randy Newman, Monty Python, Spinal Tap, "Saturday Night Live," "South Park," Key and Peele and a bountiful bevy of B's: Leonard Bernstein, the Beatles, Rachel Bloom ("Crazy Ex-Girlfriend"), Bo Burnham and Bugs Bunny. Because satire is often dependent on social and historical events, this course is as much cultural history as music appreciation. And while words are preeminent in musical satire, we will also discuss the music and its interactions with lyrics. We will include some (brief) exclusive interviews with songwriters and performers: "Weird Al" Yankovic, Michael Palin (Monty Python), Country Joe McDonald, Mike Stoller (Lieber & Stoller), and more. Instructor: David Misch. Registration deadline is Dec 30. A mandatory orientation will be held on Jan 5 at 12:00 pm (MT) for all enrolled attendees.

Note: Students interested in taking this class must complete an application found here: https://utah.sjc1.qualtrics.com/jfe/form/SV_afTUBOcHBu33qvA. You can find information about the program on our website: https://admin.pediatrics.medicine.utah.edu/pediatrics/research/education/academic-associate-program. Please email PedResearchEducation@hsc.utah.edu with any additional questions. The student must also complete paperwork for hospital access before the start of the semester. Failure to do so may result in being dropped from the course. Additionally, there will be a mandatory course orientation on the Friday before classes begin. Information regarding the aforementioned hospital access paperwork and course orientation will be published on Canvas and sent to each student's Umail account about one month prior to the semester start date. Please check Canvas and Umail frequently for further updates.

Note: Must have completed PED 5900 with at least a B- to take the course. There will be a mandatory course orientation on the Friday before classes begin. Information regarding hospital access paperwork will be published on Canvas and sent to each student's Umail account about one month prior to semester start date. Please check Canvas and Umail frequently for further updates.

Note: Due to high demand, students interested in taking this course must complete an application. Please contact PedResearchEducation@hsc.utah.edu for this application. There will be a mandatory Physician Extender course orientation in the Primary Children's Hospital ER on the Friday before classes begin. Information regarding hospital access paperwork will be published on Canvas and sent to each student's Umail account about one month prior to semester start date. Please check Canvas and Umail frequently for further updates.

Note: Course Description: Adventures in the wilderness come in many forms: climbing, mountaineering, canyoneering, whitewater rafting, backcountry skiing, scuba diving, and more. But how do we choose acceptable levels of risk when planning such encounters? How do we mitigate the risks we choose? And what decisions do we make when our priorities turn from fun to survival? Moreover, what motives and attitudes guide our own approaches to adventure in the first place? This course will examine the philosophical, ethical, and medical components of adventures in wilderness environments. Students will encounter fundamental ethical dilemmas in wilderness medicine and recreation through a variety of real-life case studies. To deepen students' background knowledge of these concepts, we will explore some of the technical aspects and philosophy on risk and risk-mitigation in outdoor adventures, with outstanding episodes and case studies examined as highlights of these concepts. In addition, the course will also ensure students understand basic concepts in wilderness medicine and survival in extreme environments, with a focus on trauma and musculoskeletal injury, heat injury, dehydration, hypothermia, frostbite, altitude sickness, avalanche danger, dive medicine, and psychological considerations in survival situations. Philosophical and bioethical considerations will be woven throughout the length of the course, with special focus on basic ethical theory and concepts of autonomy, paternalism, and justice, the epistemology of risk management, and more.

Note: Classes may be taken individually or as part of the full program. Registration for this program, and payment of the $25 non-refundable fee, signifies the intent to complete all courses associated with this program. Fees cover additional student services provided for our students. Students will register for individual classes as their schedule allows. Tuition is due for each individual class at the time of registration.

Note: This section is for enrollment in the full cohort, which includes students concurrently enrolled in the Human Resources Management Program. You will attend an in-person class meeting at Sandy Center three consecutive Tuesdays. No substitutions can be accommodated. This section is designed for those who have not yet completed any eligible coursework in the Employment Law Microcredential.

Note: This course will take us into the Dark Sky certified areas of Utah and surrounding public lands to explore a sampling of trails, buttes, vistas, and the celebrated dark skies of Utah. From our basecamp, we will venture out by foot during the day to explore wildlands. At night, we will journey deep into the cosmos to study the dark skies of Utah, explore indigenous interpretations of constellations, and learn why our state has more dark sky parks than any other in the nation. This course has two pre-trip meetings, day hikes, dark sky exploration, and overnight camping. Camping is required. Class meets on-campus on March 15th and at the Clark Planetarium (downtown SLC) on March 1st. Attendance at both class meetings is mandatory. Field experience will be from March 17th to March 19th. Overnight camping. *Drops are not possible after the second day following the first class meeting.* To determine the last day to drop this miscellaneous course, see http://registrar.utah.edu/handbook/miscellaneous.php

THIS DEPARTMENT ENFORCES UNDERGRADUATE PREREQUISITES. Please note that the registration system may not factor in transfer work when determining if prerequisites have been met. If you are unable to register for a course and think you have met the prerequisite(s), please contact an advisor from this department to inquire about obtaining a permission code. You may be administratively dropped from a course if the prerequisite has not been met.

Departmental Advisors:

Academic Advisor  L. Shaw  LNCO 3701

STUDENTS WHO DO NOT ATTEND THE FIRST TWO SESSIONS OF ANY WRITING PROGRAM CLASS WILL FORFEIT THEIR SPACE.

For course descriptions and pre-requisite information click on the subject column next to the appropriate catalog number.

This department enforces undergraduate prerequisites. Please note that the registration system may not factor in transfer work when determining if prerequisites have been met. If you are unable to register for a course and think you have met the prerequisite(s), please contact an advisor from this department to inquire about obtaining a permission code. You may be administratively dropped from a course if the prerequisite has not been met.
